

Statistics in Action: Understanding a World of Data

Correlations available at www.keypress.com/kentucky. Statistics in Action will help you prepare your students for success on the AP Exam. You'll be able to cover all the AP Statistics topics-before the AP Exam. With the first 11 chapters, you'll give students the concepts, skills, explanations, and experiences they need to learn and retain the material tested on the AP Exam. After the exam you can teach the last chapter, which covers more advanced material. You will find it easier to motivate your students as they work with real-world data and authentic case studies.

Teacher Edition ISBN if applicable					

<p>Overall Recommendation:</p> <p>Overall Strengths, Weaknesses, Comments:</p> <p>This text is on the AP stats approved list. The text engages the students in real-life situations and data gathering. It is easy to read and understand and not overbearing as some AP books. It would be appropriate to use this book with students not in an AP course. The teacher materials include Calculator notes for the TI-83, 84 Plus, Instructor's guide, Statistics in action with Fathom applications, and instructor's resource book with CD.</p>	<p>Recommended as BASAL</p> <p style="font-size: small;">if this box is not checked, the evaluators have chosen NOT recommend as basal</p>
